

SPEEDWRAP® CINCH STRAPS—

IT'S A SIMPLE SOLUTION!

SPEEDWRAP® **BRAND**

Self-Engaging Fastener

SPEEDWRAP® CINCH STRAPS are a self-engaging fastener system with hook and loop woven on the same surface.

This single component closure offers a truly unique alternative to traditional two component sewn or welded hook and loop closure.

Each strap is infinitely adjustable.

No welds to fail, no stitching to break!

Simply wrap the bundle, feed the loose end back through the buckle, cinch the strap down and go. Available in white or black. The SPEEDWRAP® Cinch Straps are PERFECT FOR MARINE, MEDICAL, COMMUNICATION OR INDUSTRIAL APPLICATIONS.
